

Setting up TradingView Window

When you subscribe to Pro-Setups, you are given access to 3 indicators: Pro-Setups, Volume and Financials on Charts. Let's find out how to put them on charts, answers to some FAQs and few tips & tricks to make sure that your screen is not cluttered.

A. How to put indicators on chart:

Click on Indicators, then Invite-only, and finally all the three indicators that appear.

Indicators, Metrics & Strategies

Search

- Favorites
- Personal
- Technical
- Financials
- Community
- Invite-only**

TradingView allows 2 indicators only with Free account. If you don't use Financials, you can ignore that indicator.

C. How to see Commentary Box

Go to Pro-Setups indicator's settings and enable the Commentary Box.

COMMENTARY

☒ Commentary

% away from 52-Week High, Low & All Time High: 30

Width of Bollinger Band Gap %: 12

Table ☒ Text ☐ Size Normal Position Top Right

E. Save the Indicator Template

Finally, save the indicator template using the four squares option, available in the Top Middle of your chart screen.

B. How to see only Financials on Charts Notes in the Volume pane.

Go to the indicator's settings, and choose to see Key Notes

Click on three horizontal dots near the settings and move the indicator to the existing pane above.

TWP: Financials on Charts

Inputs Style Visibility

Choose between Financials Summary or Key Notes: **Key Notes**

Choose scale: Crores

Remove this indicator from favorites

Visual order

Visibility on intervals

Move to

Pin to scale (now Z)

Existing pane above

D. How to declutter the chart window

Go to Settings on top-right of your window or with a right click anywhere on chart.

Chart settings

Symbol

Status line

Scales and lines

Canvas

Trading

Alerts

Events

INDICATORS

☒ Titles

☐ Arguments

☐ Values

Go to **Status**

line option, Uncheck Arguments and Values under Indicators.

Go to **Canvas**,

decrease the margins. A bit subjective, but 4% is sufficient.

MARGINS

Top: 4 %

Bottom: 4 %

Right: 4 bars

Go to **Trading** option, uncheck everything. Can also uncheck everything in the **Events** option, except **Earnings**.

- Adjusting the Zoom level of your chart window using Ctrl + or Ctrl - will also help.
- You can increase or decrease the size of Volume info panel, Commentary box and Financials on Charts Key Notes panel from the respective indicator's settings.
