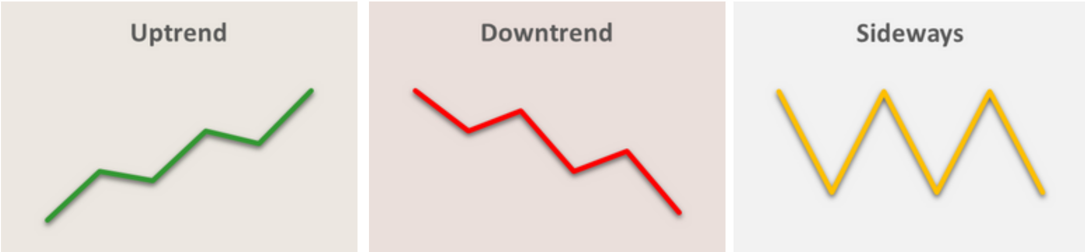
The Four Key Stages of a Stock's Journey

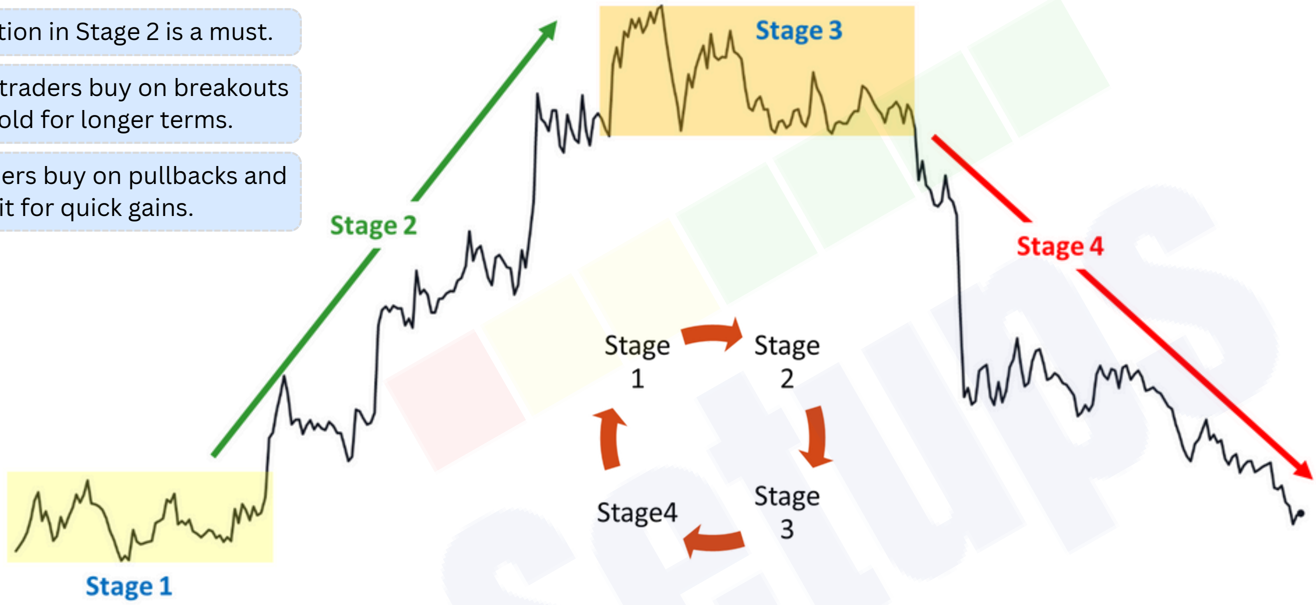
What is a Trend?
A Trend is the general direction in which prices are moving over the given timeframe.

Staying away from market / stock during Sideways movement of Stage 1 and 3 will save you tons of money.



Traders that can recognize Stages correctly are able to identify the best profit-making opportunities.

- Participation in Stage 2 is a must.
- Positional traders buy on breakouts and hold for longer terms.
- Swing traders buy on pullbacks and exit for quick gains.



Stage 2 offers confirmed unidirectional uptrending price movement. It is the best & safest time to trade

Stage 1: Party preparation
Nothing happens here, except sitting bored

Stage 2: Party in full swing
Everything happens here, this is when you make money

Stage 3: Time to say Bye
Now, is the time to leave the party after having a good time

Stage 4: Cleaning up time
Stuck! Better clean up with the host now.
